Pham Hai is an excellent infrastructure expert with nearly 10 years of experience. He has worked for a wide range of projects throughout Vietnam from the planning stage to the construction stage and has collaborated with various consultancy companies overseas. His planning & design projects range from 30 - 500 ha, master planning up to 22,000 ha in scale.

At enCity, Hai manages the planning and design department in the Vietnam offices with a team of experts in planning, urban design, architecture and transport planning. Sharing about his planning principles, Hai said: "Planning and design always need to be associated with construction implementation, management and operation. We prioritize creating impacts by breakthrough design planning strategies and practical proposals with high feasibility."
